Technology Transformation

Create a curriculum that evolves with our changing multimedia landscape.

Theresa McGee

Tech Philosophy
Moving toward technology integration doesn't mean discarding traditional art-making processes. Technology can complement what you already do and create learning opportunities for students.

Time
The reality is that learning and applying new technology takes time.

Technology Access
Discuss with your school administrator the importance of infusing technology into all areas of the curriculum.

Check out this list of grants to help you get the technology you need: **tinyurl.com/ArtGrants**.

Take charge of your own learning and develop a PLN (Personal Learning Network)

ArtEd 2.0: arted20.ning.com

Art Education Blogs: tinyurl.com/ArtEdBlogs

Art Education Yahoo Group: tinyurl.com/ArtEdYahoo

Twitter
Make a habit of checking regularly—it's a great place to discover practical uses for technology in education.

Build Teaching Tools
Find teaching resources for you and your students on YouTube (**youtube.com**), Vimeo (**Vimeo.com**), and Slideshare (**slideshare.net**).

Web Tools and Resources (**tinyurl/108Tools**)
Wix: website builder (**wix.com**)
Glogster: multimedia interactive (**edu.glogster.com**)
Aviary: image editor (**www.aviary.com**)
Art Babble: art videos (**artbabble.org**)

Goal
Learn one new tool this year and apply it to your teaching. No one can learn everything at once. Take baby steps and watch your stride get longer with each new integrated tool.
